What do S2 Chemistry pupils think?

Some S2 pupils were asked their opinion on the S2 Chemistry course.

Here is what some of them said.

I like all the practical periods. I enjoy Chemistry because most of the topics are fun. We do a lot of experiments. Some of the stuff is useful for everyday life and if you are interested in a scientific job you should choose Chemistry.

Leah Stewart, S2

I have loved the Chemistry course so far. I’ve loved knowing about the periodic table and its founders. I also enjoyed knowing about elements and the inside of atoms. Improvements- less written, more practical.

Kate Thwaites, S2

I enjoy the Chemistry course and everything I am learning. I particularly enjoy all the experiments. I always enjoy myself in Chemistry.

Katie Allen, S2

The work is amazing. You learn about everything in a fun way.

Cameron McKenzie, S2
I find the Chemistry course brilliant. It is full of interesting experiments and loads of amazing things that I have learned. I know that all the things I have learned I will use again. I look forward to Chemistry every day.

Anna McKenzie, S2

I like Chemistry because I find it interesting learning what things are made of and how they react.

Jack Brough, S2

Chemistry is my favourite subject. I like the experiments and I want to be a vet or a Chemistry teacher so it will help me in the future.

Simone Mullen, S2

I really engage with the activities. The lessons are always interesting and make you think.

Caleb McGowan, S2

Choosing Chemistry gives you a big variety of scientific jobs to choose from. The experiments are GREAT!

Miruna Popescu, S2

Chemistry was much better than I expected. I like the experiment with the alkali metals with water. There is more homework than I expected.

Arwen Borris, S2
